PRODUCT DESCRIPTION

Why Buy Our Touchdown Spaces Divider Wall Workstations?

The **Sapphire Wall System** offers touchdown spaces divider wall workstations built in a variety of shapes, sizes, and panel colors. This highly versatile panel system--with heights ranging over 7', 8' or 9'ft--is completely freestanding with no permanent attachments to your floor or ceiling.

In other words, our touchdown spaces divider wall workstations are a breeze to set up or take down. It usually takes less than a day to assemble (depending on the size of the project).

Also, you can also customize the panels of our touchdown spaces divider wall workstations in a variety of ways; choose all glass or mix in laminates and fabric panels. The **Sapphire Wall System** is a beautiful, modular wall alternative to traditional drywall construction--which can take weeks of construction and downtime.

What Comes With This Product?

Touchdown spaces are useful. The modular panels pictured are White laminate and Blue Lagoon fabric thrown in for a pleasing color scheme. The worksurfaces pictured feature Driftwood laminate.

Also, the overall length of the divider wall is just over 22'. However, you can change the modular panels with different colors and styles of fabric and laminates to suite your taste or match your corporate brand. This gives you control over the look and feel of your divider wall.

What Else?

Finally, the demountable glass partitions made with our **Sapphire Wall System** are fully compatible with any items available in our **Sapphire Cubicle System**, which includes workstations, furniture, and accessories such as file storage, shelving, overhead storage, desks, chairs, and padded benches, paper racks, and accessory rails.
