PRODUCT DESCRIPTION

Why Buy Our Glass Cubicle Walls?

The **Sapphire Wall System** features glass cubicle walls which can be built to a variety of shapes, sizes, and panel colors. This highly versatile panel system--with heights ranging over 7', 8' or 9'ft--is completely freestanding with no permanent attachments to your floor or ceiling.

In other words, our glass cubicle walls are a breeze to set up or take down. It usually takes less than a day to assemble (depending on the size of the project).

You can also customize our glass cubicle walls in a variety of ways. Choose all glass panes or mix in multi-colored laminates and fabric panels. The base of each panel features inline data and electrical "raceways" to manage cord and cables. The **Sapphire Wall System** is a beautiful, modular wall alternative to traditional drywall construction--which can take weeks of construction and downtime.

What Comes With This Product?

The 9'4"W x 7'6"D x 95"H configuration pictured on this page shows how we use three modular walls to build off one existing wall. This is a very popular cubicle typical for the **Sapphire Wall System**. The walls are comprised of clear tempered glass. The front-facing wall consists of floor-to-ceiling glass panes with glass panel swing door. Additionally, you may upgrade to a traditional solid swing door with locking doorknob.

This glass cubicle wall arrangement can be made in various widths and lengths. Just let us know your size requirements.

What Else?

Also, the glass cubicle walls made with our **Sapphire Wall System** are fully compatible with any items available in our **Sapphire Cubicle System**. This includes workstations, furniture, and accessories such as file storage, shelving, overhead storage, desks, chairs, and padded benches, paper racks, and accessory rails. Give us a call to customize yours today!
