PRODUCT DESCRIPTION

Why Buy Our Glass Top Office Walls?

The **Sapphire Wall System** features glass top office walls which can be built to a variety of shapes, sizes, and panel colors. This highly versatile panel system--with heights ranging over 7', 8' or 9'ft--is completely freestanding. There's no need for permanent attachments to your floor or ceiling.

In other words, our glass top office walls are a breeze to set up or take down. It usually takes less than a

day to assemble (depending on the size of the project).

You can also customize our glass top office walls in a variety of ways. You can choose all glass panes or mix in multi-colored laminates and fabric panels. Additionally, the base of each panel features inline data and electrical "raceways" to manage cord and cables. The **Sapphire Wall System** is a beautiful, modular wall alternative to traditional drywall construction--which can take weeks of construction and downtime.

What Comes With This Product?

The 9'4"D x 16'6"W x 84"H arrangement pictured on this page is a great example of a popular typical order from our customers. As you can see pictured, we can create two separate office cubicles where none existed previously by making use of two existing walls. As a result, these office spaces can now be used for whatever purpose you see fit.

This configuration features Slate and Lime Green fabric topped with glass panels, doorway, White laminate worksurface, and our electrical and networking cord "raceways" hidden along the base to hide messy looking wires and cabling.

What Else?

The glass top office walls made with our **Sapphire Wall System** are fully compatible with any items available in our **Sapphire Cubicle System**, which includes workstations, furniture, and accessories such as file storage, shelving, overhead storage, desks, chairs, and padded benches, paper racks, and accessory rails. Give us a call to customize yours today!
