

AT DESK FOOT FLEXOR - 2 HEIGHTS AVAILABLE

\$67.48

The smooth pivoting action of the Foot Flexor encourages changes in the position of hips, legs, ankles and lower back muscles. This helps reduce static muscle loading, thereby avoiding the fatigue that can result from sitting in one position all day. For higher seat height requirements, Foot Flexors ensure that stress is not placed on the veins in the back of the thighs and avoids potential circulation problems.
