PRODUCT DESCRIPTION

Our 12" tall desk screens and privacy dividers are designed to enhance the personal space, safety, and privacy between people & employees. Privacy screens create artificial barriers on desktops, tables, and worksurfaces. Additionally, the material we use (PET) to make these acoustic privacy screens helps reduce the amount of distracting, ambient noise.

PET (Polyethylene Terephthalate) is a lightweight, felt-like material which helps diminish noise within a work environment. It's made from 100% recycled plastics such as soda bottles and food packaging. Also, because the PET material is soft and dense, it reduces high-frequency noises which frequently distract people while at work.

Our privacy screens come with metal desktop clamps which are adjustable. Each panel offers over a dozen colors. Our acoustic privacy screens are available in widths of 23", 35", 47", 59", or 71". They ship within 2 business weeks.

Finally, we offer customization for all our **eSCAPE** products made from PET. We can add flourishes,

logos, and corporate branding. Customization is available for an additional design fee plus the cost of the item.

The acoustic privacy screens can be used in a variety of ways. For example, on tables, countertops, desks, or any shared surface in your workplace. Custom sizes are available (call for assistance).
