PRODUCT DESCRIPTION

Why Buy Our Dual Collaboration Room Partitions?

The **Sapphire Wall System** offers this dual collaboration room partition. You can customized it in a variety of shapes, sizes, and panel colors. This highly versatile panel system--with heights ranging over 7', 8' or 9'ft--is completely freestanding with no permanent attachments to your floor or ceiling.

In other words, our dual collaboration room partition is fully demountable. It usually takes less than a day to assemble (depending on the size of the project).

You can also customize the panels of our dual collaboration room partition in a variety of ways; choose all glass or mix in laminates and fabric panels. We offer multiple color fabric and laminate options. The **Sapphire Wall System** is a beautiful, modular wall alternative to traditional drywall construction-- which can take weeks of construction and downtime.

What Comes With This Product?

The **Sapphire Wall System** pictured here is a dual collaboration room partition configuration. It is meant to take a large, existing area of your office and divide the space into two separate rooms. These rooms can be used for a variety of purposes such as conference or collaboration rooms. This arrangement of the **Sapphire Wall System** creates individual spaces 16' deep, around 15' wide, and 8' in height.

Also featured are hinged swing doors with an inset glass panel and custom lock if you prefer. The front facing walls are all comprised of tempered glass modular panels. The dividing partition features White laminate and Slate colored fabrics. In fact, you can make all kinds of alterations to our wall system. We have several fabric colors and laminates from which to choose.

What Else?

The dual collaboration room partition of our **Sapphire Wall System** are fully compatible with any items available in our [Sapphire Cubicle System](#), which includes workstations, furniture, and accessories such as file storage, shelving, overhead storage, desks, chairs, and padded benches, paper racks, and accessory rails.
